Copenhagen Market

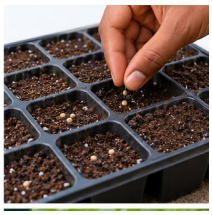

Cabbage planting guide

Start in trays or a seedbed

Choose a cool growing period with full sun and fertile, well-drained soil. Adapt sowing dates to your local frost, heat and rainfall.

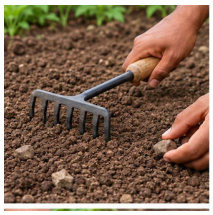

SEED DEPTH	FINAL PLANT SPACE	ROWS / DENSITY
About 4 mm	**About 40 cm**	**About 60 cm**

1. Start seedlings

Sow about 4 mm deep in clean seedling mix. Keep gently moist and give seedlings light after emergence.

2. Prepare the bed

Work compost into fertile, well-drained soil. Remove weeds before the seedlings are planted.

3. Plant with room

Gradually acclimatise strong seedlings. Plant about 40 cm apart, with roughly 60 cm between rows.

4. Water and check

Keep moisture even and weed gently. Check leaves regularly as heads form; avoid large wet-dry swings.

Harvest: Cut heads when firm and compact, before they split. Retain a few outer leaves to protect the head.

Growing note: Use cool local windows and check head firmness. Sowing dates and harvest timing depend on weather, site and current seed-lot advice.

Use local conditions and the current seed-lot label. Method illustrations show the practice, not exact cultivar appearance.
