Lazy Housewife

Climbing bean planting guide

Direct sow beside a trellis

Warm, frost-free weather. Avoid extreme heat during flowering. Full sun.

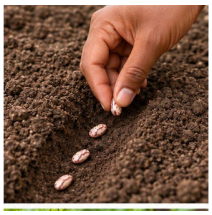

SEED DEPTH	FINAL PLANT SPACE	ROWS / DENSITY
2-3 cm in heavier soil; 3-5 cm in sand	**10-15 cm in field rows**	**90-100 cm in field rows**

1. Fit strong support

Install a sturdy trellis before sowing. Prepare well-drained soil alongside the support.

2. Sow beside the trellis

Sow 2-3 cm deep in heavier soil, or 3-5 cm in sandy soil. Cover and water gently.

3. Guide the vines

For field rows, leave 10-15 cm between plants and 90-100 cm between rows. Guide young stems onto the trellis.

4. Keep the crop supplied

Water evenly, especially during flowering and pod growth. Weed gently around the roots.

Harvest: Pick young, tender pods regularly before their seeds become large.

Growing note: These are KZN field-row distances. Garden packet layouts may be wider. The actual GoldPack seed-lot label takes priority for depth and spacing.

Use local conditions and the current seed-lot label. Method illustrations show the practice, not exact cultivar appearance.
