RL-4

Inter-specific cucurbit rootstock

For watermelon and melon grafting

SUPPLIER-REPORTED FEATURES

01 Powerful root system

A powerful root system is a key feature of the hybrid.

02 Yield potential

The supplied technical sheet describes a contribution to very high yields.

03 Soil-borne disease resistance

Good resistance to fungal soil-borne diseases affecting watermelons and melons.

04 Easy grafting

Easy-to-graft rootstock, as described in the supplied technical information.

Grafted cucurbit seedling.

PACK SIZE

1,000 seeds only

Price on request

Technical context

All features above are supplier-reported. The supplied sheet does not specify pathogens or disease races. Performance and yield depend on growing conditions and field management; local validation is not established by this sheet.

Technical source: Supplier-provided technical information. Reviewed 16 October 2026.
